# X1 Social Discovery™

The Breakthrough eDiscovery Platform for Social Media and Website Collection

X1 Social Discovery<sup>™</sup> is the industry's first investigative solution specifically designed to enable eDiscovery and computer forensics professionals to effectively address social media content and web content, in one single interface. X1 Social Discovery provides for a powerful platform to collect, authenticate, search, review and produce electronically stored information (ESI) from Facebook, Twitter, LinkedIn and other web sources.

## Social Media Discovery & Website Collection

Social media is now a very common source of evidence in criminal and civil litigation and must be routinely addressed in discovery. However, despite the obvious necessity for social media eDiscovery, legal and investigative professionals have lacked a means to cope with social media data in their workflow, in the same manner as email and files, until now.

X1 Social Discovery is designed to effectively address social media content from the leading social media networking sites such as Facebook, Twitter and LinkedIn. In addition, it can crawl, capture and instantly search content from any website.

Unlike archiving and image capture solutions, X1 Social Discovery provides for a matter-centric workflow from search and collection through production in searchable native format, while preserving critical metadata not possible through image capture, printouts, or raw data archival of RSS feeds.

X1 Social Discovery uniquely provides eDiscovery and computer investigation professionals a complete platform to effectively address social media eDiscovery and conduct website collection, in one single interface.

# About X1 Discovery

X1 Discovery offers next generation eDiscovery and enterprise search solutions specifically designed for IT, electronic discovery and legal professionals. Built upon the market leading X1 search solution for business professionals, X1 Discovery delivers eDiscovery that provides a platform for social media eDiscovery and effectively supports investigations of cloud-based data.

# **Key Advantages**

- Investigative platform
- Matter-centric workflow
- Fast-as-you-type patented, X1 search
- Automated collection
- Preserves metadata
- User friendly interface
- Export to review platforms

"X1 Social Discovery provides the eDiscovery industry with a prime time solution to address social media."

Erik Laykin Duff & Phelps

"In my tests, X1 was fast and responsive...The interface is clean and simple, with a logical layout. And the feature set is just about everything you could ask for as you dig into the burgeoning mounds of status updates, tweets, digital pictures, hash tags, comments, and links."

# Search, highlight content and automatically preview links

#### Single click web capture

X1 Social Discovery is available for sale at an introductory price of \$945 per copy annually.

For a 14 day free trial, to schedule a demo or for more information:

info@x1discovery.com 877-999-1347 www.x1discovery.com

#### Collection

Data is collected and indexed from social media streams, linked content and websites through APIs and direct web navigation. X1 Social Discovery aggregates data from these multiple sources in real time, in a highly scalable and case-centric manner.

## Authentication

MD5 hash values of individual social media items are calculated upon capture and maintained through export. Automated logging and reports are generated. Key metadata unique to social media streams are captured through deep integration with APIs provided by the sites.

#### Search

Perform broad, unified searches across multiple accounts, social media streams and websites from a single interface. Linked content is automatically indexed and searched and the results are aggregated for sorting, tagging and export consistent with standard eDiscovery workflow.

#### Production

Maintain social media data in a searchable native format from collection through production, uniquely providing a complete platform to address social media in the same manner as e-mail and e-documents.

#### Minimum hardware requirements

OS:	Microsoft Windows XP SP2, Vista (x86 & x64); Win 7 (x86 & x64)
CPU:	1 GHz (min)
Memory:	1 GB RAM for 32-bit or 2 GB RAM for 64-bit (min)
Disk:	1 GB free hard disk space (min); 100 GB recommended
Software:	Microsoft .NET framework 4.0
